

# PROCOM HEADSETS

## GAMEDAY CHECKLIST

### PRE GAME

- Make sure all batteries are fully charged
- Take out each headset and power them on. **Make sure the main headset unit is turned on in order for your system to operate.**
- Make sure you are on the correct channel as the other coaches that you are talking to.

### DURING GAME

- When you are not talking, flip up your microphone boom to limit background coach chatter

### POST GAME

- Clean all units and make sure they are moisture free \*
- Put units away into your case so they are ready for your next game or practice.

**\* If your units and LoudMouth were exposed to moisture, it is strongly recommended that you thoroughly dry everything off and keep everything out of your case for 24 hours. This will prevent condensation from building up inside the case, and ensure the longevity of your system.**
