

PROCOM HEADSETS

SYSTEM TIPS

- **The main headset unit must be turned on for your system to operate.** *Even if you are only bringing 2 headsets to practice, one of them must be unit 1.*
- **If your system gets rained on, do not put them away wet.** *Wipe each unit down and ensure that they are dry before putting them in your case. This will alleviate any condensation accumulation within your case and ensure system longevity.*
- **Ensure each unit is charged.** *If the gang charger is not charging, or the batteries are completely dead, you may need to use wall adapters for each unit. See reference below of how your unit will look while charging, and when fully charged.*
